

Marine Environmental Threats

MET-BIP: new Erasmus mobility programme

It's a hybrid programme that combines virtual with face-to-face training, with three EU universities involved in the teaching. Go deeper into the different causes and consequences of the threats that are jeopardizing the future of our oceans.

UNIPV - ITALY

MONITORING PORTS

Short physical mobility
(Fieldwork + labwork + lectures)

- Marine bioinvasions
- Underwater sound pollution
- Biological indicators of pollution

Università degli Studi di Pavia - Italy
